

UDHAYAPRAKASH G

Software Engineer

Thirukalukundram, Chengalpattu, Tamil Nadu - 603019 | udayaparakashdev@gmail.com | +91 6380694414

SUMMARY

Python Developer with 3+ years of experience building scalable backend applications, automation solutions, and data-driven systems. Skilled in Django and FastAPI for REST API and backend development, with hands-on experience in RPA and Python. Experienced in developing modular, maintainable code with strong error handling, logging, and performance optimization. Proficient in integrating AI/ML models for intelligent document processing and workflow automation, with a focus on delivering scalable, efficient, and production-ready solutions.

TECHNICAL SKILLS

Programming and Database:

- Python (Advanced)
- Java
- C#, VB.Net
- MySQL, PostgreSQL, Microsoft SQL Server

RPA and Autmation Tools:

Uipath, Automation Anywhere, Blue Prism, Nividous, Robot Framework, Power Automate, Selenium, Playwright

OCR & AI Tools:

- PaddleOCR, Tesseract OCR
- AWS Bedrock and Textract
- Open AI and Copilot
- Hugging Face Transformers
- TensorFlow (Basic)

Web Frameworks:

- Django, FastAPI, Flask
- REST API Development

DevOps & Tools

- Git, GitHub
- Logging & Monitoring
- CI/ CD

Frontend & Scripting

- HTML, CSS, JavaScript
- React Js

PROFESSIONAL EXPERIENCE

Software Engineer, Navitas Lifesciences Pvt. Ltd.

March 2023 - Present

- Developed scalable backend applications using **Django, Flask, and FastAPI**, including secure maker-checker workflows and admin dashboards.
- Designed and implemented RESTful APIs for document validation, automation tracking, and workflow orchestration.
- Built OCR-driven document processing pipelines using **AWS Textract**, PaddleOCR, and Tesseract, improving extraction accuracy by 80%+.
- Developed end-to-end Python-based automation solutions using **Robot Framework**, reducing manual effort by 70%.
- Integrated NLP and ML models (Hugging Face, TensorFlow) for document classification, semantic matching, and intelligent extraction.
- Created reusable automation frameworks using **UiPath REFramework** and **Automation Anywhere IQ Bot**.
- Implemented robust error handling, logging, and performance optimization strategies.
- Delivered scalable, high-quality solutions with minimal human intervention, significantly improving business productivity.
- Automated web workflows and QA testing processes using **Selenium** and **Playwright** with Python, improving operational efficiency, test coverage, and turnaround time.
- Developed and deployed scalable automation and AI-driven solutions that reduced operational costs, accelerated business workflows, and improved overall system reliability across multiple enterprise projects.

PROJECT HIGHLIGHTS

Intelligent Document Processing System

- Built OCR + NLP pipeline using **AWS Textract**.
- Automated data extraction, classification, and validation workflows.
- Reduced manual processing time by 70%.

Regulatory Web Intelligence System

- Automated regulatory data collection from 25+ websites using **Playwright** with Python.
- Used Hugging Face sentence similarity models for intelligent content matching and validation.
- Developed UI automation workflows for monitoring and extracting regulatory updates.
- Reduced manual effort through automated web intelligence processing.

EDUCATION

B. Tech Biotechnology

Aug 2018 - Jun 2022

Karpaga Vinayaga College of Engineering and Technology
Chengalpattu, Tamil Nadu

ADDITIONAL INFORMATION

- **Languages:** English, Tamil
- **Certifications:** Nividous RPA Essentials and Advanced
- **Awards/Activities:** Overall Best Employee (2024)
